Eunice – 20t 6x4 bogey

Baby Jayne – 15t portable

Merry Christmas to all our clients and other friends, from us at IGS:

Allan; Andrew; Chris; Glen; Michael; Sarah; Stephen; Tony.

It's been a challenging year for everyone, but we've survived and even thrived - and we've developed ourselves and our systems even further.

We're looking forward to 2010. Three reasons:

1. We enjoy what we do.
2. We enjoy working with our clients.
3. We think our clients enjoy working with us.

What could be better than that???

Baby Jayne on Darling Harbour

A couple of months ago we reported the evolution of our mini-rig Baby Jayne into a really functional multi-purpose 15t in situ testing machine. We were excited and, in our hearts, predicted "great things to come".

Well, Baby Jayne (plus two of our great people) has just finished IGS's first over-water job – piezo-cone testing from a jack-up barge in Darling Harbour, for the Sydney Metro Stage 1 project.

- The job went well.
- The test results were good.
- Our client, Coffey, was happy.
- We learnt a lot.

Where we've been this year

Cooperook, Mooloolaba, Shark Creek, Eagle Farm, Ballina, Port of Brisbane, Grafton, Lytton, Botany, Hope Island, Brisbane Airport, McLean, Narara, Gosford, Toombul, Tarcutta, Banora Point, Grahamstown Dam, Marrickville, Bli Bli, Port Botany, Chinchilla, Berwyndale, Windimbri, West End, Kurnell, Maroochydore, Ourimbah, Curtis Island, Lillyfield, Shortland, Newcastle, Kogan Creek, Pinkenba, Currimundi, Gerringong, Kempsey, Weipa, Gladstone, Darling Harbour, Kenya Pond.
