Young Geo-Professional's Prize 2014

The winner is Ross Kristinof

This is a tremendous prize for which I'm immensely proud and thankful .

I'm really looking forward to meeting and learning from some of the best minds in the in-situ testing industry!

Ross is a geotechnical engineer with Jacobs SKM, based in Melbourne.

He graduated from Monash University in 2006 and spent his early career undertaking site investigations and geotechnical reporting in Victoria, Queensland and Western Australia.

Ross took off to London to pursue an MSc at Imperial College in 2010, and since his return has been involved in site investigation and design for infrastructure projects around the country.

The Prize

- Part 1 of the prize is fully-funded attendance at the CPT'14 Conference in Las Vegas in May this year. A "bench mark" conference for people involved in up-to-date site characterisation.
- Part 2 of the prize is fully-funded attendance at the 2014 Young Geotechnical Professionals Conference (10YGPC) that will be held in Noosa Heads in September this year. Ross will be preparing a presentation paper for that conference based on his learnings at CPT'14.

***Congratulations Ross - enjoy
You earned it***

reducing geotechnical uncertainty
