IGS is committed to minimising the environmental impact of the workplace.

Insitu Geotech Services Pty Ltd is an Australian owned specialist insitu testing service provider operating throughout Australia and South East Asia. The company is committed to providing a work place where the environment is considered during all work performed. We recognise that minimising the environmental impact of our operations is a priority in the successful operation of the company.

The objectives of the IGS Environmental Policy are:

- To implement an Environmental Management System that enables the company and employees to comply with Environmental Management Acts, Regulations and Codes of Practice.
- To make environment an integral part of every decision made by all employees of IGS in order to achieve an incident free work place.
- To provide all employees with the skills required to make and implement responsible and sustainable work practices through internal and external training programs.
- To develop and implement low impact insitu testing techniques.
- To operate an Environmental Management system that is understood and adhered to by all employees.
- To regularly consult and communicate with employees regarding the environmental management decision making.
- To continuously improve on the sustainability and environmental processes within IGS to reduce employees' and the public's risk of exposure to hazards.
- To report, investigate and learn from all incidents and events which occur within the work place.
