In Situ Permeability

Insitu Geotech Services Pty Ltd (IGS) is an Australian owned specialist insitu testing service provider operating in Australia and South East Asia.

The company started in business in the year 2000 to introduce up-to-date in situ testing technology into the market with the objective of “reducing geotechnical uncertainty”. It was founded by Allan McConnell, a well-known geotechnical engineer (FIE Aust) who has had 50+ years’ experience working on most parts of the east coast of Australia.

IGS is staffed in the field by a team of highly motivated people who have been trained in-house, supplemented by training at international conferences and focused training courses. Our personnel can work in the field unsupervised; are multi-skilled and self-managed.
