IGS is committed to providing appropriate rehabilitation practices within the workplace.

Insitu Geotech Services Pty Ltd is an Australian owned specialist insitu testing service provider operating throughout Australia and South East Asia. The company recognises that there are substantial benefits to be gained from rehabilitation practices and is committed to implementing such practices at its workplace to assist the healing process and helps restore the worker's normal function sooner.

The objectives of the IGS Rehabilitation Policy are:

- To provide a safe and healthy work environment, but in the event of an injury or an illness, to make sure workplace rehabilitation is started as soon as possible in accordance with medical advice.
- To ensure appropriate suitable duties are made available to injured or ill workers to facilitate their safe and early return to work. These duties must be consistent with the current medical certificate and will be time limited.
- To respect the confidential nature of medical and rehabilitation information and to ensure there will be both verbal and written confidentiality.
- To ensure all workers are aware that, in the event of injury or illness, they will be consulted to ensure a structured and safe return to work that will not disadvantage them.
- To comply with legislative obligations with respect to the standard for rehabilitation.
- To adopting a multidisciplinary approach to rehabilitation as required.
- To reviewing this policy and procedures as required to ensure it continues to meet legislative requirements and the needs of all parties.
