

RIG DATA SHEET

LIMPET (IGS18)

Pusher stays vertically stable & isolated as barge moves with the tides and waves

Purpose-built sea-floor standing rig for soft soil sites

Suction feet apply caisson suction principles

Deployed from JUB, Spud barge, wharf deck etc.

Reaction force dependant on dead weight & applied suction

150-200kN push capacity

Year Built: 2022

Test Types:

- CPT and CPTu and Seismic CPTu
- Tee-Bar and Ball Cone
- DMT & SDMT/ SPDMT, Medusa DMT
- Direct-Push Vane Shear

Also:

- Installation of VWP Piezometers
- Installation of Casagrande Standpipes
- In Situ Permeability (coarser soils)
- IGS Sampling
